The first of these is the
 fact that the population of the
 country is increasing rapidly.
 This is due to a number of
 causes, the most important of
 which are the increase in the
 birth rate and the decrease in
 the death rate. The birth rate
 has increased because of the
 improvement in the health of
 the population and the
 increase in the number of
 children born to each couple.
 The death rate has decreased
 because of the improvement in
 the medical services and the
 increase in the life expectancy
 of the population.

The second of these is the
 fact that the country is
 becoming more and more
 industrialized. This is due
 to the fact that the country
 has a large number of
 factories and a large number
 of workers. The country is
 also becoming more and more
 urbanized. This is due to the
 fact that the population is
 moving from the countryside
 to the cities. The country is
 also becoming more and more
 developed. This is due to the
 fact that the country has a
 large number of roads and a
 large number of schools.
